

MOTORS FOR HYDRAULIC APPLICATION

Wide range of MOTORS are manufactured for :

- Battery powered material handling equipments like Pallet/Platform/Forklift trucks; High rise stackers; Walky units etc...
- TRACTION Motors for drive and HYDRAULIC Powerpacks.

Range : (0.5 KW - 2.2 KW)

TRACTION motors FOR TUNNEL / MINING LOCOMOTIVES

- Drive motors for AMUSEMENT PARK equipments like Baby / Mini Trains, Merry-go rounds etc...
- DASHING CAR Motors with BUILT IN GEAR unit and RUBBER TYRE on rotating stator Normally traction motors are series wound with high overload torque capabilities.
- However , with latest development in Chopper Controls, separately excited motors are also used for traction in battery powered vehicles.
- Hydraulic powerpack motors are short time duty operation, compact in size and are series or compound wound.
- Any type of tailor made motors can be developed as per customer's specifications and requirements.
